PROJECTS

Breton – Furniture e-commerce website
Use of technologies: *HTML, CSS, JavaScript, larger, MySQL.*

A fully functional e-commerce website was developed that specializes in premium chairs and residential decoration articles. The site has a modern and easy to use interface, which ensures a smooth existence for customers.

URI: https://breton-middleeast.com/

Moeen – Ride & Delivery Service App
Use of technologies: *HTML, CSS, JavaScript, Laravel(Backend),* MySQL, *WebSockets, REST APIs.*

Moeen is a mobile application for RIDE lining and delivery service designed to connect drivers and customers effectively. The app offers a spontaneous and safe platform for rides and accessories.

Fleet Management System
Use of technologies: *HTML, CSS, JavaScript, Laravel(Backend),* MySQL, *WebSockets, REST APIs.*

Fleet is a sophisticated management system which integrates with different workshops and provides maintenance and servicing for cars, light and heavy vehicles. System facilitates invoice creation, booking management, and many more operations to enhance the convenience of workshops and customers.

Visitor Management System
Use of technologies: *HTML, CSS, JavaScript, Laravel(Backend),* MySQL, *WebSockets, REST APIs.*

Visitor management system is an advanced solution designed for hotels and similar installations, which leads to visual check-in and check-outs. The system includes a kiosk for self-service operation, a QR code scanner for quick access and an appointment management facility. Additionally, it offers a dedicated portal to efficiently manage visitor records for companies and increase safety and convenience
